LED ECOFRESH BARS

LED Ecofresh Bars are a tailored lighting solution designed to illuminate food displays to bring out the best visual appearance of the display while protecting the food from harmful Infrared and UV light.

We offer a range of colour temperatures from 2700K to 6500K to best suit your display. Designed to work in -40°C and up to 50°C.

Ideal for swap out of existing (fluorescent tubes) refrigeration lighting, creating up to an 80% saving of energy through use of LED.

EASY TO INSTALL WITH BRACKETS

ENERGY SAVINGS OF UP TO 80%

CONNECT UP TO 7 METERS
